**Laser Cut Maps & Puzzles:** We now laser cut all of our maps and puzzles! This change took place at beginning of 2003. If you are not sure, look around the inside edge of the frame. If it is blackened all around then you have a laser cut map. Our LASER CUT map pieces can be replaced by just telling us the map and piece name! Be sure you request the correct name as labeled in our controls, call if not sure!

**OLDER MAPS & Puzzles:** WE MUST HAVE THE WHOLE MAP OR PUZZLE TO ASSURE A PROPER FIT!

## TABLES

### CHOOSING TABLES

*We offer natural wood finish or laminate surface tables. Natural finish is a smooth work surface and appropriate for most Montessori materials. However it can be scratched with a pen or pencil. Lunch tables or Practical Life tables should have a laminated surface, as fine wood should not be exposed to water.*

**Note – Tables over 20" tall or spanning 30" or more require an apron for strength and stability.**

### Solid Hard Rock Maple Tables All solid maple tables have aprons.

(While we love wood, we recommend laminate for durability)

These tables have become very popular! They are 12" deep, 14" wide and 5" high and weigh less than 6½ lbs.

Use this Table for recording when your students are doing their math or language exercises on a rug. They are small enough for a student to carry.

### **Lap Tables**

This is the perfect solution for classrooms that have limited space. Made of

quality Baltic Birch plywood, it only weighs around 8 lbs. and is easily assembled by young children. For storage, it folds flat to only 1" thick. By self-assembling this table children learn to follow sequential instructions and improve motor skills. They will also enjoy using the simple tools included for assembly (mallet and wedges). Included with each Lap Table is a one page pictorial only instruction on how to set up the table and, for elementary students, text only instructions.
